Micro Hanger

The micro hanger is WCP's smallest coiled tubing hanger system. It is intended for shallow, low-pressure, dead well installations. An extremely simple, but robust design, that is simple to install and operate. A single packing nut adjusts the compression of a Viton sealing element around the outside of the coiled tubing. The packing nut doubles as a bowl for our industry leading tubing slips.

LIGHT WEIGHT

1,000 PSI W.P.

UP TO 1 ½" C.T.

- Hang off up to 1 ½" tubing
- Light weight for easy installation
- Top swedge with optional secondary seal
- 1,000 psi working pressure
- Available Connections:
 - 2" l.p.
 - 2 3/8" 8rd
 - 2 7/8" 8rd
